SUMMARY

I'm a QA Analyst specialized in Game QA, with 4 years in game studios and 7 years across the technology industry. I have tested 50+ game projects and interactive experiences across Mobile, PC, Fortnite/UEFN, Roblox, Web3 and LumePad 3D. Technical background in web and backend development: API testing, analytics validation and technical investigation — always weighing technical behavior and player experience.

Open to Senior Game QA and QA Lead roles. Remote from Brazil (UTC-3) · Open to full-time, contractor, freelance and relocation.

EXPERIENCE

QA Analyst — Hermit Crab Game Studio

Nov 2022 – Present

- Coordinate QA activities across 4–6 concurrent game projects, defining test scope and priorities per milestone
- Act as the bridge between Production, Development and QA within a QA team of 4–6, translating defect findings into actionable development tasks
- Communicate risk assessment and release readiness to stakeholders, validating 4–8 release candidates per month
- Standardize bug reporting and QA processes across projects and teams
- Validate platform compliance against store and ecosystem requirements
- Execute functional, regression and exploratory testing across game projects
- Validate gameplay, UX and first-time user experience
- Test multiplayer scenarios and device compatibility across low-end, mid-range and reference device tiers
- Validate accessibility and localization requirements
- Report and reproduce defects, then verify fixes, using device logs (adb/logcat) and crash reports (Firebase Crashlytics)
- Distribute and validate mobile builds through TestFlight and Google Play Console testing tracks
- Test APIs and validate analytics event tracking
