SUMMARY

QA Analyst specialized in Game QA, with 4 years in game studios and 7 years in technology. I have tested 80+ games and interactive experiences on Roblox, Fortnite/UEFN, The Sandbox, mobile, PC and Lume Pad 3D, working in QA teams of four to five people. Technical background in web and backend development: API testing, analytics validation and technical investigation, weighing technical behavior and player experience.

Remote from Brazil (UTC-3). Open to full-time, contractor, freelance and relocation.

EXPERIENCE

QA Analyst — Hermit Crab Game Studio

Nov 2022 – Present

- **Multiplatform Game QA:** functional, regression, smoke, integration and exploratory testing of gameplay, UX/FTUE and multiplayer on Roblox, Fortnite (UEFN), The Sandbox, mobile, PC/Steam and Lume Pad 3D
- **Test design and risk:** test cases and exploratory scenarios written from requirements and product risk, with test scope and priorities per milestone and testing tasks distributed within the QA team
- **Bug reporting and investigation:** defects reproduced and documented with steps, expected and actual results, severity and evidence (adb/logcat, Firebase Crashlytics), then the fixes verified
- **Release validation:** platform and store compliance (Roblox, Fortnite, The Sandbox, App Store, Google Play), mobile builds through TestFlight and Google Play Console tracks, and QA status, risks and a go/no-go recommendation for Production
- **Coverage:** device compatibility (low-end to reference tiers), accessibility, localization and gamepad play on PC
- **Technical checks:** analytics events (GameAnalytics, Firebase, Roblox Analytics) validated and APIs tested with Postman
- **Ports and web releases:** 20+ partner-studio ports to carrier (telco) stores through Gameloft and to Leia's Lume Pad 1 and 2 3D tablets (3D effect, performance, controls and store requirements), plus web releases on CrazyGames
- Use AI to support test documentation, information organization, analysis and market research

QA Analyst — Space Bit Games

Sep 2022 – Nov 2022

- **Manual QA on mobile games:** functionality, usability, stability and player experience
- **Test scenarios and defects:** scenarios created and run, defects documented with clear reproduction steps
